

## Industrial Machinery and Equipment

At JAAS Systems our goal is to provide you with a total system to run your business profitably. We understand the unusual demands placed upon you, as an industrial machinery and equipment manufacturer, by your customers. JAAS Advanced Manufacturing Software (JAMS) for Acumatica was created by experts with hundreds of years of combined experience in the manufacturing industry. This knowledge, combined with new cloud technology from Acumatica, delivers a feature-rich, fully integrated manufacturing, distribution, customer management, project management, and accounting solution.

Our solution provides industrial machinery and equipment manufacturers an end-to-end manufacturing ERP solution:

- ✓ Project Management for your Research and Development
- ✓ Document Management, Quality Management, and Workflow Management
- ✓ Customer Management for your sales and marketing efforts as well as service and support
- ✓ Depth and control from the beginning; from Bill of Material revision control through our robust shop floor capabilities including cradle to grave serial lot traceability

As an industrial machinery and equipment manufacturer, you face one of a kind challenges. Not only must you meet unique engineering requirements, you must also assist your customers' calls for higher quality, lower cost and rapid delivery. You need a solution that will assist in reducing labor and material costs, increase profits and maximize sales, ensure the highest quality products are delivered, and support the production of complex products through a comprehensive end-to-end solution; thus making JAAS Systems and JAMS a compelling partner.
