

Advanced Manufacturing

Since manufacturing requirements might vary from company to company, JAAS Systems developed the Advanced Manufacturing module to address the unique needs of specific manufacturers.

The Repetitive Production Reporting screen quickly and easily reports production without entering a formal production order.

Benefits:

Supports requirements for mixed mode and repetitive environments

Universal interface works with multiple data collection devices for automated upload into JAMS

Supplies a solution for unique packaging and complex labeling requirements

Allows for a single production order to be routed through multiple locations

Supports the two ways to account for the costs.

“When Manufacturing is Your Business™”

Advanced Manufacturing Module

- Backflushing
- Lot/Serial Tracking
- Bar Code Interface
- Multi-Site Manufacturing
- Repetitive Production Reporting
- Repetitive Labor Entry
- Repetitive Materials Release
- Advanced Packaging Requirements
- External Production Order Interface
- Supports Multiple Costing Methods
- Production Performance Analysis
- Multiple Finished Items on a Production Order

Creates packaging specifications.
